

IDS TS5 Touchscreen

10.1" DISPLAY & CONTROL UNIT FOR YOUR IDS NETWORK

DATA
SHEET

Touchscreen

The IDS Touchscreen provides a handy and ergonomic user interface to control remote equipment over your IDS network while its powerful display processor delivers all the information and alerts you need to keep your broadcasts running smoothly.

Housed in a steel enclosure, it can be wall or desktop mounted meaning your control interfaces can be placed exactly where you want them. It connects to your network via Ethernet making installation quick and painless. Management of the unit is straightforward, using IDS Core or via a USB keyboard plugged in directly.

Applications

The TS5 is the perfect workflow tool – use it as a production timer or off-set timer, for clocks and tally information or for live visual feedback. Control IDS accessories and other essential equipment connected to your IDS network. Change channels on TVs situated in another studio, control STBs in your master control room, cameras in live studios or respond to noise level alerts from remote monitors. Any number of units can be installed on your system.

IDS TS5 Touchscreen

What is IDS?

IDS. The super cool intuitive and revolutionary workflow information solution. Originally designed as a simple clock and tally system for broadcasters, IDS harvests information from across wide area networks, aggregating it using a simple toolset, providing facilities with the power to display only the information you want, the way you want it. Boundless flexibility that lets you into a world of simple integration giving you access and total control of essential equipment at a touch by using an IDS touchscreen.

IDS is the cutting edge media technology solution and can be scaled to suit any installation, whether Industrial, Service, Broadcast, AV, Education, Defence, Medical or Corporate. Simplifying the complicated, putting the user in charge. IDS already brings groundbreaking solutions to a prestigious set of customers around the globe.

Key Features

- Stand-alone USB setup
- Assignable network configuration
- 100Mb Ethernet
- Very low power consumption
- Compact, rugged construction
- 1 year warranty

Key Benefits

- Discreet desktop control and display device
- Control remote devices over your IDS network
- Design your own control and display interfaces using IDS Core

Technical specifications

- Construction: Steel
- Dimensions: L 176 x W 30 x H 258 mm
- Weight: 2.4kg
- Connectors: 3 x USB, 1 x 100Mb Ethernet, 12v dc
- Communications: 100Mb
- Power supply: 12v dc
- Power consumption: 4W typical, 8W peak
- Operating temperature: 0°C to +50°C
- Approvals: FCC, CE
